

Antonio Carraro TTR 7600 Infinity

www.knuesel-sepp.ch/produkte-1/antonio-carraro/

The **Antonio Carraro TTR 7600 Infinity** is a versatile and modern tractor specially designed for use on demanding and hilly terrain, mowing embankments, maintaining roads, clearing snow and maintaining municipal green spaces and sports fields. The tractor is equipped with a stable frame and a low center of gravity for maximum safety on steep slopes. The Antonio Carraro has a reversible driver's seat system, which means that the driver can turn the seat and steering wheel 180 degrees in a matter of seconds to work both forwards and backwards. It has a comfortable cab with air conditioning and a vibration-absorbing seat for long working hours. Thanks to its compact design, the TTR 7600 Infinity is extremely maneuverable and can easily negotiate tight bends and uneven terrain.

Special features of the Antonio Carraro TTR 7600 Infinity:

- Hydrostatic transmission: allows infinitely variable speed adjustment and precise control of traction force, ideal for jobs that require high accuracy.
- Reversible driver's platform: Offers maximum flexibility and efficiency, as the tractor can be operated both forwards and backwards without the driver having to change position.
- Robust construction: The TTR 7600 Infinity is built for continuous use in demanding conditions, with high quality materials and a well thought-out design that ensures durability.

Model	Antonio Carraro 7600 TTR Infinity
Motor / rated power PS	Kohler / Stage 5 / 75 hp / Turbo / 4 cylinders
Travel drive	Stepless hydrostat / 3 mechanical groups
Hydraulics / control valves	2400 kg continuous lifting capacity 2 DW rear / 1 free return Volume flow 40lt
PTO shafts / PTO shaft speed	rear 540/750 rpm, powershiftable
Weight	Unladen weight: 2450 kg (with cab) Payload: 1550 kg
Special features	Reversible driver's platform Extremely suitable for slopes Total height 2090mm

Sepp Knüsel AG Tornado mower 306

www.knuesel-sepp.ch/produkte-1/knuesel-tornado-plus-mähwerke/

The Knüsel Tornado disc mower impresses with its low dead weight and unique ground tracking, even on uneven ground. The mower is centrally suspended. The double-guided oscillation enables oscillation to the left and right. The mower can be attached to any tractor or mowing tractor thanks to various mounting brackets. The extremely slim mower blade with large blade overlap ensures top cutting quality and optimum forage flow.

Features:

- Unique in terms of ground hugging
- Slim mower blade
- Three-point linkage with push-pull design
- Swing compensation up to 20 degrees
- Double pivot suspension
- Hydraulic sideshift 200 mm each
- Cutter bar in oil bath guarantees a long service life
- Supporting structure made of high-strength fine-grain steels, thus saving weight
- Cover made of impact-resistant special plastic
- Closed V-belt belt ensures little power loss and protects the gearbox of mower and tool carrier
- Folding side guards
- Hardox steel sliding cams
- Superb mowing quality even downhill
- Can be attached to all tractors and mowing tractors
- Low noise emissions

Brand	Knüsel TORNADO 306
Working width	3020mm
Blades	Blade quick-change system
Cutting height	40-70mm
PTO speed	540/1000 L/R
Power requirement	52 PS
Cultivation	Three-point cat. I / II or chord triangle
Weight	550 kg
Special features	<ul style="list-style-type: none"> - Various mower sizes available from 2.20 to 3.00 m - Hydr. sideshift 200mm - Mowing disk breakage protection
