The Knüsel family with founders Marlies and Sepp in the foreground.

Sepp Knüsel AG is a versatile and innovative Swiss family business. In addition to the founders Marlis and Sepp Knüsel, all four daughters and 40 specialists work in the company. The company has proven itself in the trade and repair service of agricultural machinery, municipal and industrial vehicles and small appliances. Sepp Knüsel AG became known for its high-quality own brands, the Rigitrac, the Knüsel mowers and the Knüsel belt rake, which are sold successfully throughout Europe. As an importer of Antonio Carraro mowing tractors, Caron transporters and SIP hay harvesters, the xelom electric mower and BB-Umwelttechnik products, we round off our extensive range.

In 2003, the vision of building our own tractor became reality. The subsidiary Rigitrac Traktorenbau AG is founded. The innovative technology of Rigitrac is convincing on the market. The tractors are characterized by their manoeuvrability, high stability on slopes thanks to their low centre of gravity, center pivot joint and low dead weight. Quality and perfection are top priorities for the Swiss family business.
