

Brielmaier Company history

<https://brielmaier.com/>

The company in self description:

Since the mid-1980s, the best motorised mowers in the world have been manufactured in the Lake Constance-Upper Swabia region: at Brielmaier Motormäher GmbH.

We are a medium-sized company with around 35 employees. We develop and produce all our innovations ourselves at our company headquarters in Deggenhausertal and are also active in contract manufacturing. We have our own sheet metal production with modern and precise laser and bending machines as well as a welding shop for steel, stainless steel and aluminium.

Brielmaier Motormäher GmbH is a company of the Swiss Rapid Holding, which employs around 180 people in Europe.

Our multifunctional machines are used in practice with a wide variety of attachments. Most of the attachments come from Brielmaier Motormäher GmbH, or from the Swiss Rapid Holding. The implements are driven hydraulically, making them highly customisable and versatile.
